### 7.2.1 Institutional best Practice

#### Best Practice 1: Adopting a village.

The college has adopted a village named “Dakhin Borpathar” which is situated 7 km from the college to the east. The village is economically and socially backward. Therefore, the objective of adopting the village was to work for its educational, social and economic upliftment. The team of students led by Dr. Mauchumi Gogoi (HOD, Department of Geography) at various times of the year conducted development programs such as tree plantation, environmental awareness meetings, health checkup camps, distribution of medicine etc. The team included students who are NSS volunteers. The college with the team has also organized programs under Fit India Program and Swachh-Bharat Mission. The villagers were involved in the program and participated actively. The villagers were highly benefited and thankful for such programs. Photos are provided below.

**Tree plantation in the adopted village on 6.6.2018**

## Best Practice 2: Eco Friendly Campus

The College has been practicing to maintain an eco-friendly campus. The practices are:

1. Cleanliness and plantation drive,
2. Using more LED lights than CFL,
3. Installation of dustbins,
4. Prohibition of tobacco consumption, gutkha, cigarettes etc. within the campus.
5. Stopping and advising students not to spit gutkha, pan masala, betel nut etc in the classrooms and College Campus.
6. Advising students to throw wastes in the dustbins only.
7. Students and faculties are advised to switch off lights, fans and other appliances before leaving the class.
